

## **Experiment No :01**

### **Experiment Name: How to install Linux operating system**

#### **Objectives:**

- What is Linux Operating system?
- Different Type of Linux Distribution.
- How can we install Linux Operating System?

#### **❖ What is Linux Operating system?**

##### **Ans:**

An Operating System is a program that acts as an intermediary between a user of a computer and the computer hardware.

#### **❖ Different Type of Linux Distribution.**

**Ans:** Linux distributions (distro) is the collection of software built on top of Linux kernels and offered as complete operating system . Distribution also offers graphical packages, open office and others. Kernel is just one components of the distribution

A Linux distribution consists of following things

- a. Kernel
- b. GNU C libraries
- c. Additional software
- d. documentation
- e. distribution specific application for installation and configuration
- f. Free applications
- g. User manuals
- h. Window systems
- i. Support information

#### **❖ How can we install Linux Operating System?**

**Step 1)** Download the .iso or the OS files on your computer from this link.

## Download Ubuntu Desktop

### Ubuntu 16.04.3 LTS

Download the latest LTS version of Ubuntu, for desktop PCs and laptops. LTS stands for long-term support — which means five years of free security and maintenance updates, guaranteed.

[Ubuntu 16.04 LTS release notes](#)

Recommended system requirements:

- ✓ 2 GHz dual core processor or better
- ✓ 2 GB system memory
- ✓ 25 GB of free hard drive space
- ✓ Either a DVD drive or a USB port for the installer media
- ✓ Internet access is helpful

[Source Code](#)

**MD5:** 36A6A087AD0EF0368506893D15FFCDA2

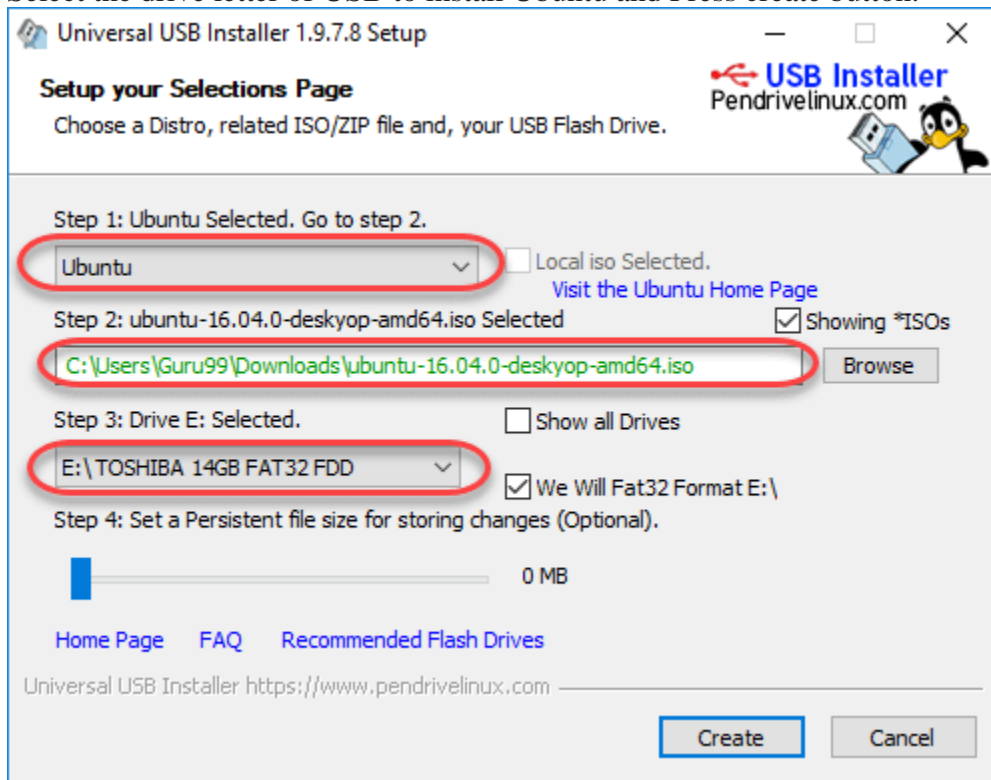

[Basic Requirements](#) [Changelog](#) [Supported Distros](#) [FAQ](#)

**IMPORTANT NOTE:** Your USB drive must be Fat32/NTFS formatted, otherwise Syslinux will fail and your drive will NOT Boot.

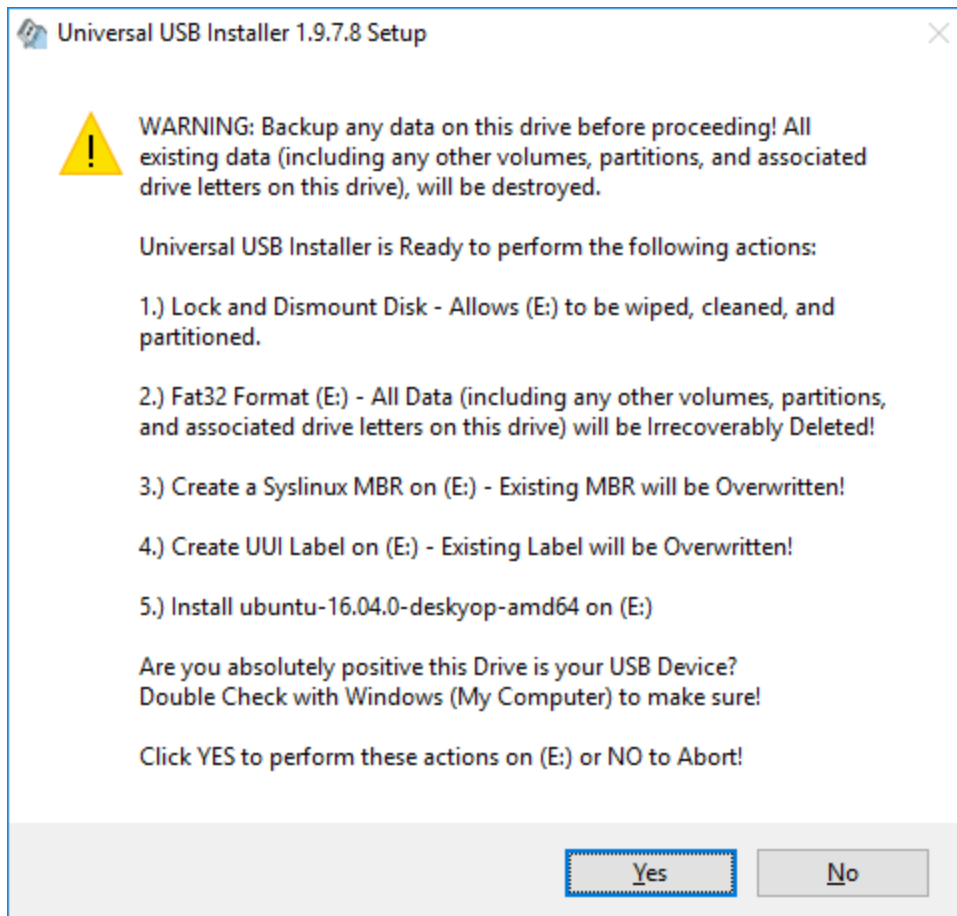

**Step 3)** Select an Ubuntu Distribution form the dropdown to put on your USB

Select your Ubuntu iso file download in step 1.

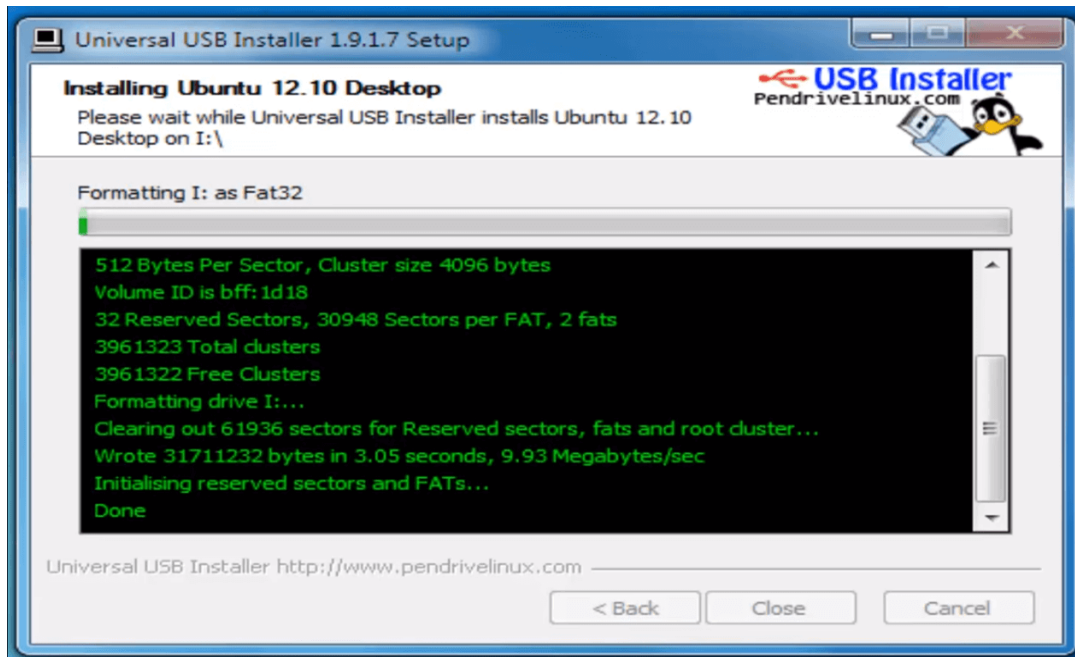

Select the drive letter of USB to install Ubuntu and Press create button.

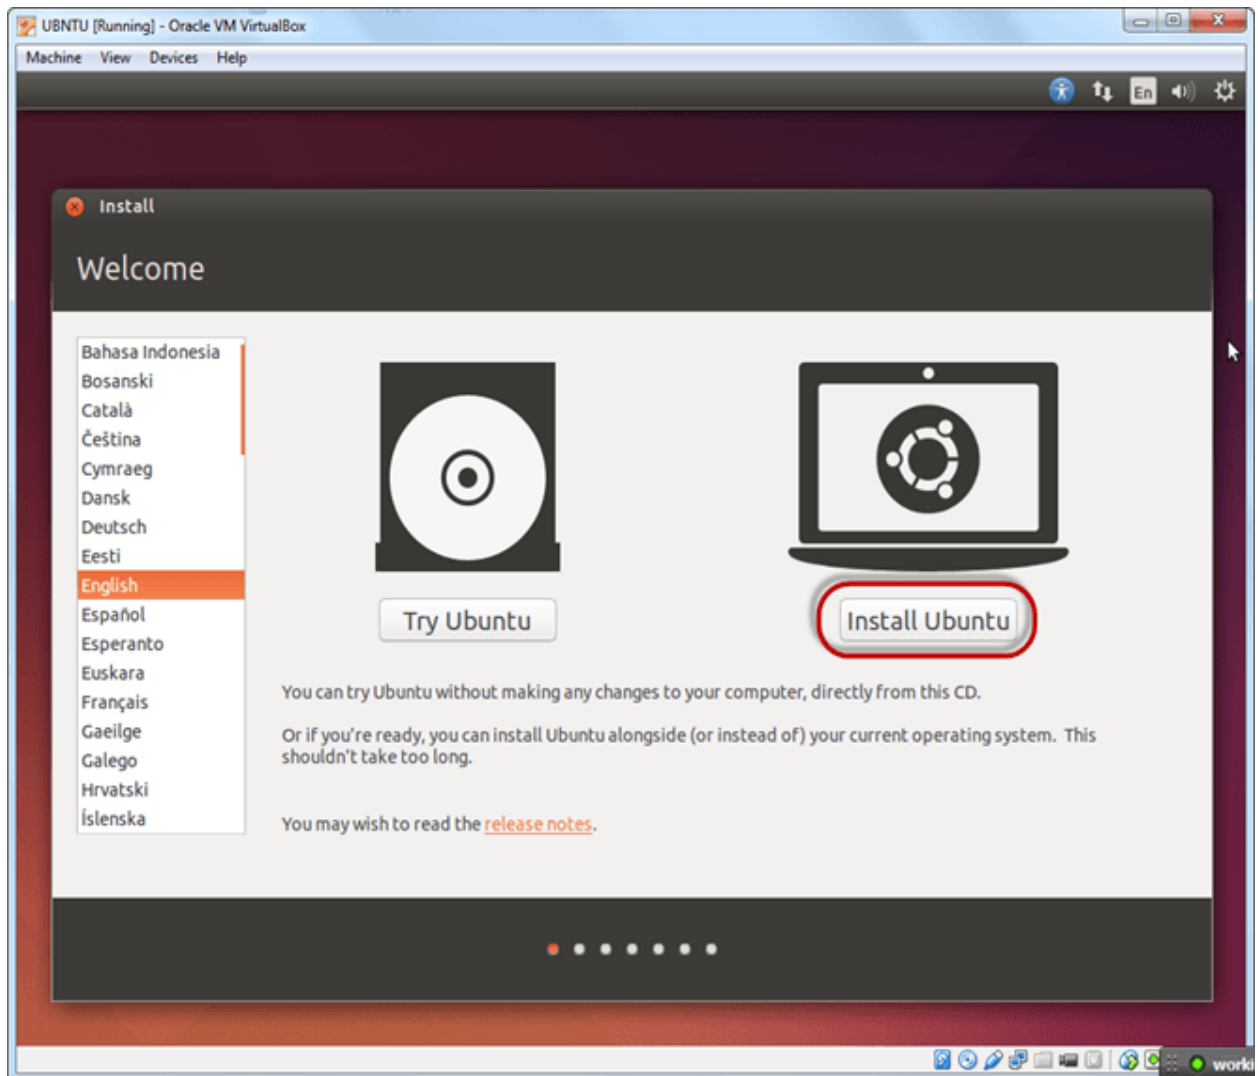

**Step 4)** Click YES to Install Ubuntu in USB.

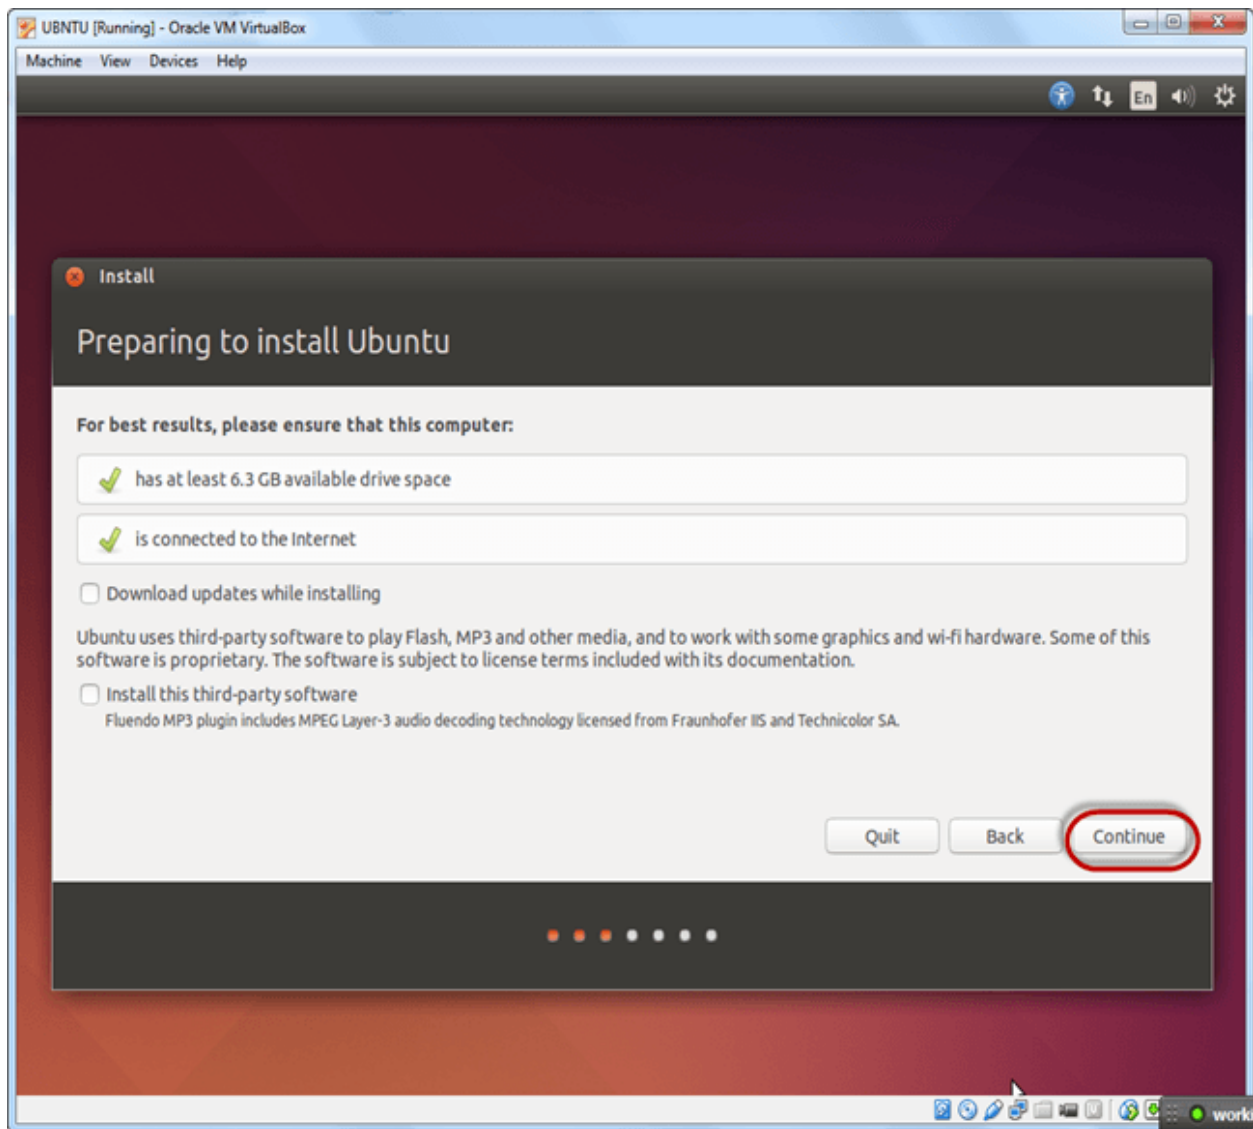

**Step 5)** After everything has been installed and configured, a small window will appear Congratulations! You now have Ubuntu on a USB stick, bootable and ready to go.

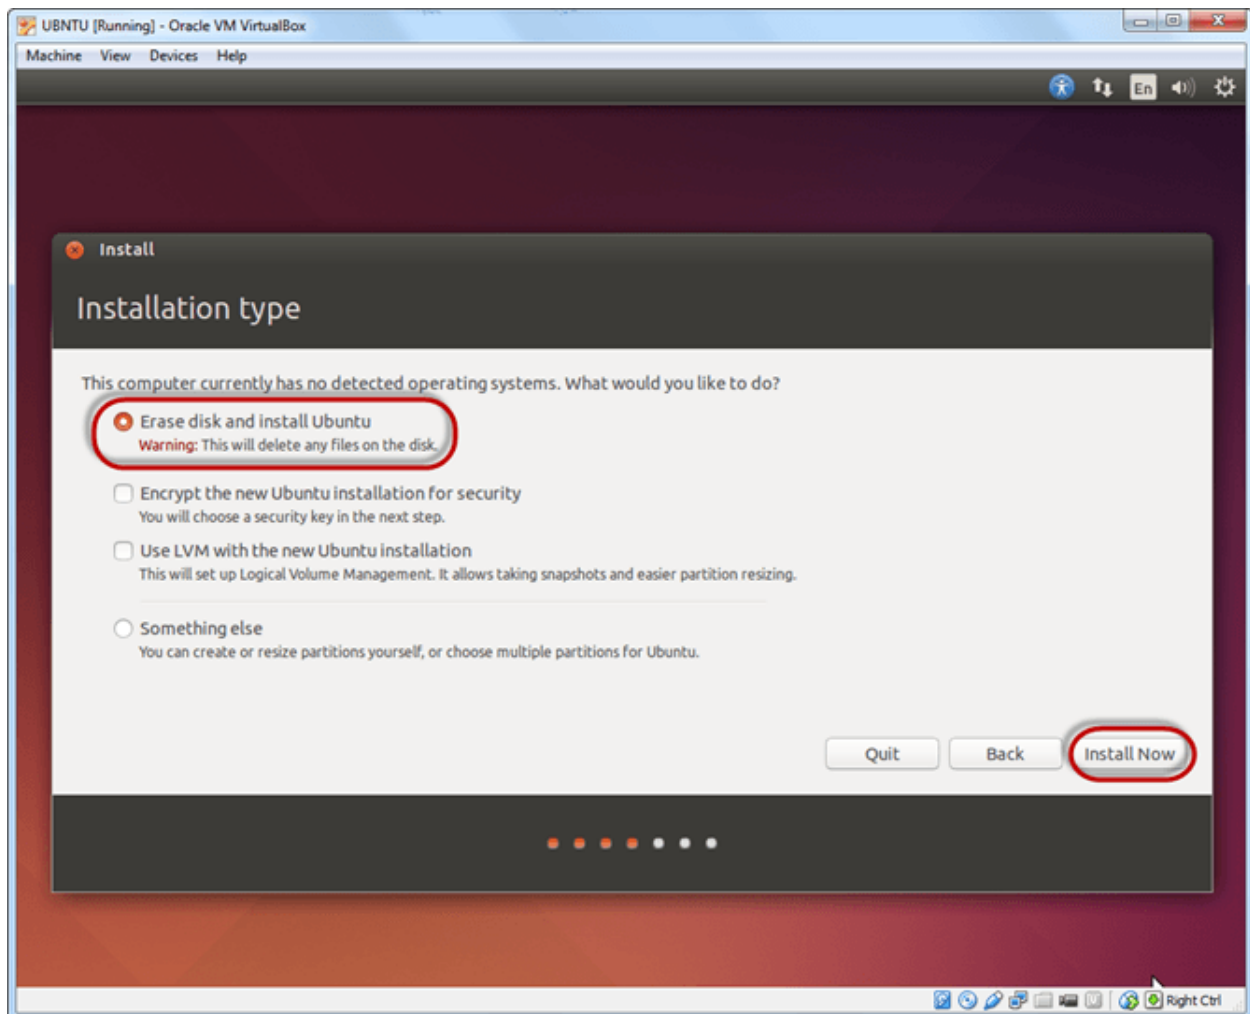

**Step-6** You have an option to Run Ubuntu WITHOUT installing. In this tutorial will install Ubuntu

**Step-7)** Click continue.

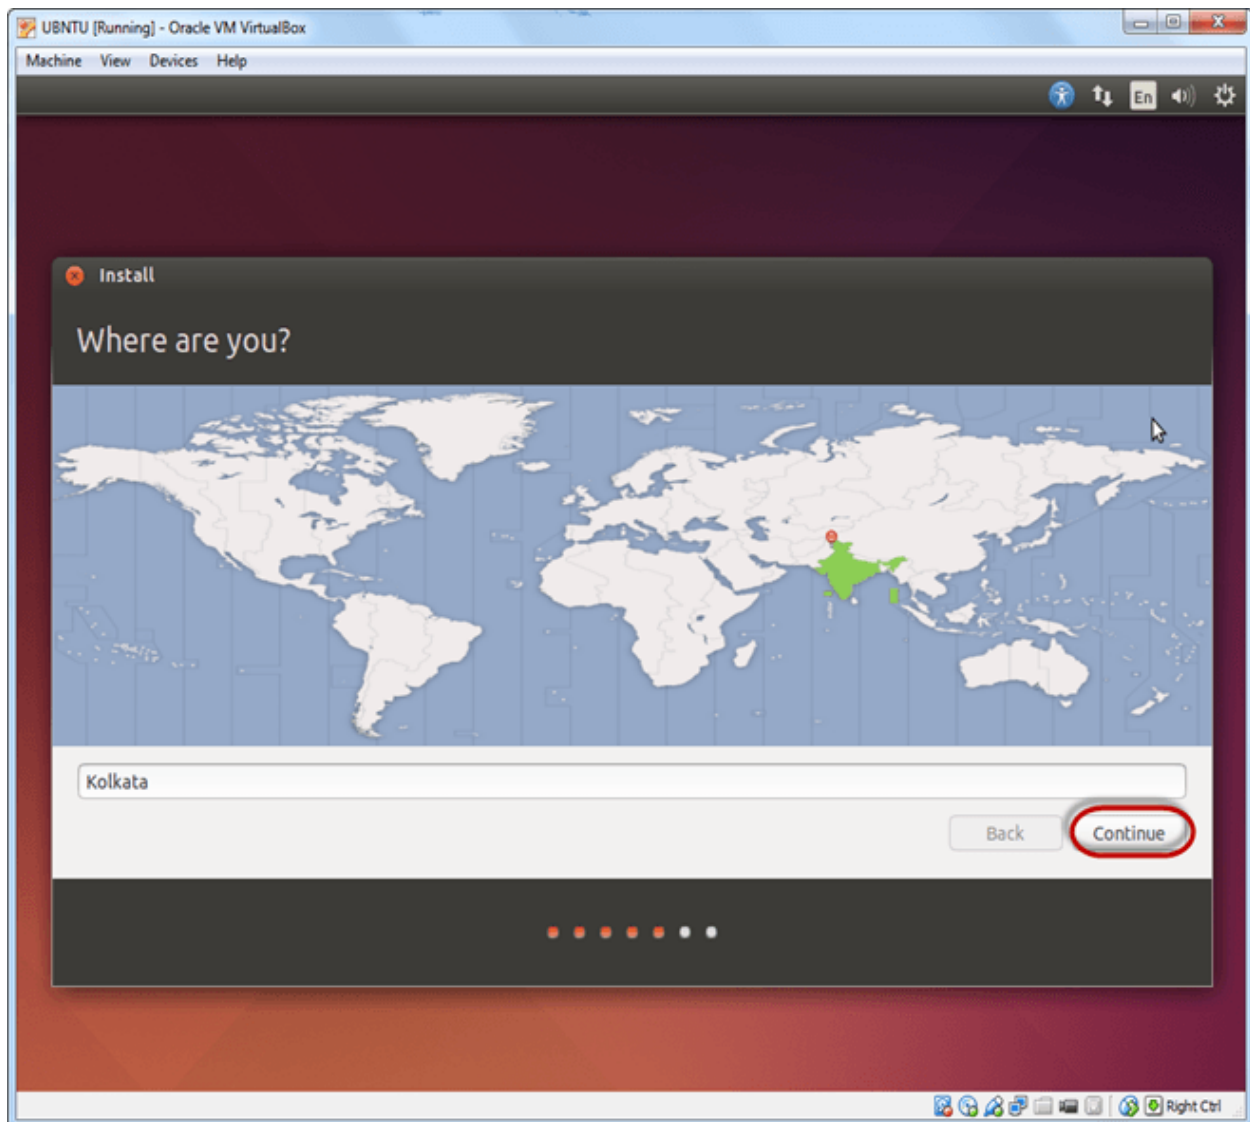

**Step-8** Select option to erase the disk and install Ubuntu and click on install now. This option installs Ubuntu into our virtual hard drive which is we made earlier. It will not harm your PC or Windows installation

**Step-9** Select your location for setting up time zone, and click on continue

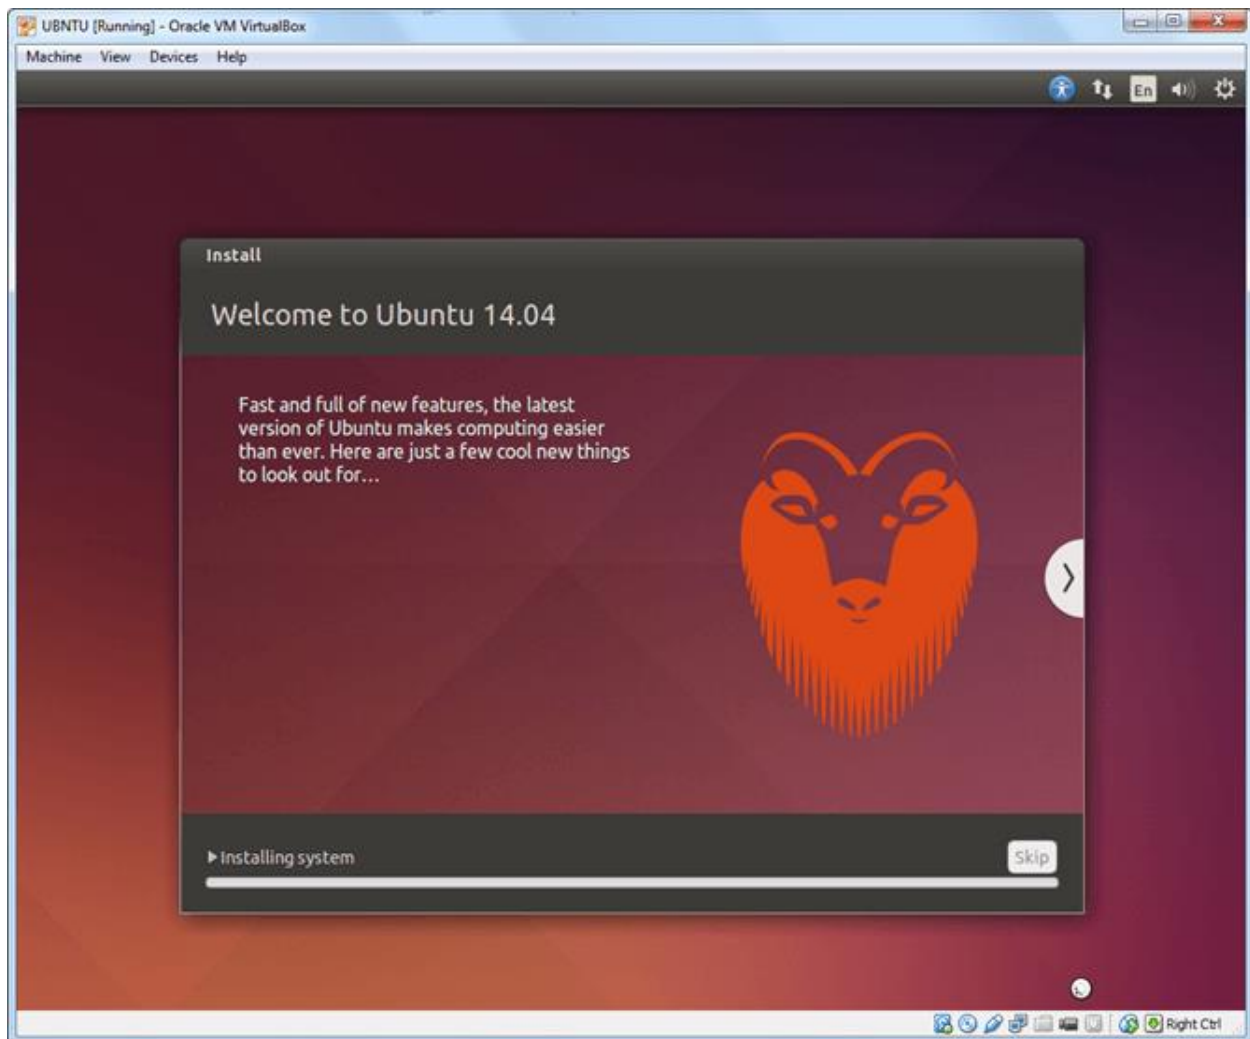

**Step-10** Select your keyboard layout, by default English (US) is selected but if you want to change then, you can select in the list. And click on continue

**Step-11** Select your username and password for your Ubuntu admin account. This information has been needed for installing any software package into Ubuntu and also for login to your OS. Fill up your details and tick on login automatically to ignore login attempt and click on continue

**Step-12** Installation process starts. May take up to 30 minutes. Please wait until installation process completes.

**Step-13** After finishing the installation, you will see Ubuntu Desktop.

## **Discussion:**

This lab helps to learn about how to install Linux operating system.
